Impact

Through providing a local currency loan to Finca Haiti, DGGF contributes to the development of an underserved SME market in Haiti, a country which is part of the World Bank’s list of fragile countries. DGGF’s funding comes in local currency at a relatively long tenor, supporting the MFI to extend longer tenor loans to its clients. As one of few NBFIs with a differentiated service offer to SMEs, Finca Haiti is well positioned to support local SMEs. While some banks active in the SME space, there are very few players that target the USD 10-50K, which Finca targets. The DGGF loan is expected to finance approximately 235 SMEs.
