Accelerating the growth of youth-led early-stage enterprises in DRC

DGGF's Seed Capital Business Development (SC&BD) facility is supporting Kobo Hub in accelerating the growth of DRC-based early-stage businesses. Early-stage dynamic businesses' growth is most often constrained by weak business models, limited capacity to execute and sometimes lack of appropriate early-stage finance. This reality is also true in DRC where local young entrepreneurs may be unsure as to where to find the support they require. Through the mentoring support provided by SC&BD in 2019, the young entrepreneurial team of Kobo Hub – first established in 2018 - has been able to refine their value proposition in the ecosystem and develop the business model that shall enable them to accelerate the growth of local early-stage dynamic enterprises.

With the support provided by the SC&BD facility, Kobo Hub will be able to strengthen its position in the local ecosystem towards attracting and growing local early-stage businesses in a sustainable manner.
