The recovery of raw materials used during the production process is beneficial for the environment and for human health.

Risk category

The exporter's CSR policy has been assessed and found to be acceptable.

DGGF1130569 supply of vacuum trailer in India

Description

The transaction concerns the delivery of one vacuum trailer to the Indian company Lloyds Engineering Corporate Private (hereinafter Lloyds) from Kolkata (Calcutta). This trailer will be used for industrial cleaning activities in the metal industry. The first task he will perform will be cleaning activities on the Tata Steel site, where raw materials will be recovered that are consumed during the production process.
