LLC Microinvest MOLDOVA

Providing opportunities for alternative markets

The demand for business and agricultural financing in Moldova remains largely uncovered. In particular for the micro and lower-end SME segment. With a strong rural presence, Microinvest very often acts as the sole lender to agricultural SMEs that are unable to obtain the necessary financing from banks.

Faced with interrupted supply/delivery chains due to the war in Ukraine, part of Moldova's SME sector is now looking for alternative western markets. This takes time and requires additional investment. The SMEs are primarily operating in the agricultural sector and have a rural outreach.

With support from DGGF, Microinvest will increase the maximum unsecured loan amount to EUR 200K. This will improve access to financing for the eligible SMEs and significantly accelerate the pace of their reorientation towards new markets and suppliers.

Investment

DGGF commits a loan of EUR 3 million
