Linea Capital SOUTH AFRICA

Providing finance for high impact SGBs

Southern African SMEs face the challenge of unavailable and collateral-heavy debt and highly dilutive equity funding options to fuel growth. Linea Capital provides an alternative solution to founders and shareholders of these businesses through revenue-based finance, which can be used as growth capital, working capital, bridge finance and asset funding.

Linea's vision is to provide growth capital to SMEs while preserving equity in the hands of founders – particularly women and under-represented founders – thereby limiting equity dilution for business owners and their staff. Post investment, Linea has partnered with organisations to supplement business growth with access to market, talent, capital and operational efficiencies. Through its innovative tech platform, Linea onboards companies at scale, enables founders to track revenues and provides comfort to investors around investee revenue reporting.

Investment

DGGF commits a loan of USD 1.250.000

Sectors

Technology-enabled services, Fintech, Mobility
