ALEG II

COLOMBIA & PERU

Supporting tech enabled SMEs in Latin America

The ALIVE Latin America Early Growth Fund (ALEG II) is an impact fund operating primarily in Colombia and Peru, investing through equity and mezzanine financing. The fund's focus is along three themes, namely access to basic products and services for marginalized populations, income generating opportunities for low- and middle-income individuals, and pathways to quality jobs. This is an expansion of the strategy of the first fund, and concretely will feature more tech-enabled investments, such as fintech.

The team has local presence with a hands-on approach and a regional track record, while also aligning well with DGGF in its impact thesis. The fund is expected to perform well on the outreach to female entrepreneurs, while also contributing to DGGF's inclusive growth objectives.

DGGF is an anchor investor for ALEG II and instrumental for catalyzing other investors.
