Specialized SME Lending in Jordan

Sanadcom for Business Finance (Sanadcom of SC) was established in 2014 to provide financing to small and medium-sized enterprises (SMEs) in Jordan, a market that is relatively underserved by microfinance institutions (MFIs) and banks. Sanadcom is a specialized SME lender, utilizing a deep understanding of credit analysis for small businesses with partially formalized operations.

It is noteworthy that, although this segment is a significant employer in Jordan, it remains underserved. As a result, companies are hindered from growing, creating employment, and unlocking economic growth. Sanadcom focuses on building long-term relationships with stable, well-managed small businesses and providing financing solutions tailored to the expected cash flows of its SME clients.

DGGF plays a catalytic role by attracting other international lenders.

Total investment

DGGF will provide a senior loan of 3 million USD

Sectors

Trade, services, industrial production
