PERU

Tailored financial services in Peru

Access to financial services is limited for many Micro and Small Enterprises (MSEs) in Latin America. To address this issue, Prestamype was established in Peru in 2017 to provide tailored financial products for this segment, with the aid of automation and digitalization. Prestamype aims to become the leading digital bank for MSEs in Peru, and eventually expand throughout Latin America, serving as their ultimate financial partner.

SCBD will provide Prestamype a subordinated loan to finance the expansion of the MSEs loan portfolio. In addition, SCBD will support Prestamype with technical assistance to further enhance the company's financial, governance and commercial capabilities.

Investment

DGGF commits a Seed Capital loan of USD 1.5 million and Technical Assistance support of USD 95.000 in three years total

Sectors

Techonlogy-enables services, Fintech
