DGGF Academy Expansion

The MSME finance gap calls for targeted and innovative MSME (non)-finance initiatives. But there are limited places where to access and gain practice-based knowledge and expertise. The general objective of establishing the DGGF Academy as a unique participatory learning community is to bring the whole emerging markets MSME finance ecosystem together. An engine to accelerate the replication of demonstrated innovations in MSME finance, amplifying DGGF's financial and impact performance.

A pilot confirmed the high demand for the DGGF Academy. Identified key success factors from the pilot and other relevant experiences are core to the new long-term offer:

1. A dedicated community manager to keep participation and momentum;
2. Leverage power nodes to drive engagement and exchange;
3. Work through partnerships to leverage content and networks and avoid duplications;
4. Face-to-face meetings also as individuals connect, to learn and gather feedback.
