

Dutch Good Growth Fund

Part: Financing Local SMEs

A programme by the Ministry of Foreign Affairs

Background

Since 2014, a consortium of Triple Jump and PwC is responsible for managing the Dutch Good Growth Fund (DGGF) Part: 'Investment Funds local SMEs' on behalf of the Dutch Ministry of Foreign Affairs.

Purpose

The DGGF aims to improve the access to finance for 'missing middle' SMEs in 68 selected countries by investing through funds and other financial intermediaries that have the relevant capacity and local presence to directly reach out to companies in the DGGF's target markets. The 'missing middle' refers to entrepreneurs whose financing needs are neither served by microfinance nor by conventional capital market players. In addition, the DGGF aims to reach out to underserved markets, foster innovative financing products and invest in specific target groups (young and female entrepreneurs and entrepreneurs in fragile states that face high barriers to attracting capital). By doing so, the DGGF contributes to knowledge transfer, increased employment and production capacity and thereby becomes a driver of economic growth.

Procedure

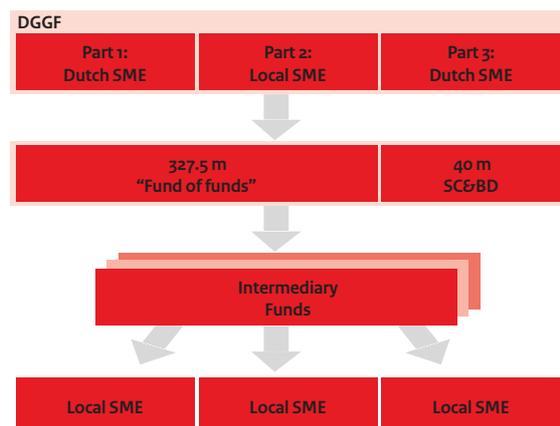

The Dutch Good Growth Fund works through a 'fund of funds' model, which consists of two distinct levels in the investment chain: 1. the DGGF invests in (mainly locally operating, existing or new) funds and financial intermediaries, and 2. these financial intermediaries in turn offer a range of customized financing products to SMEs.

The DGGF can also invest in funds that contribute to an improved ecosystem for SMEs. The DGGF does not, however, invest directly into SMEs.

Over a period of 4 to 5 years, the DGGF will build a diversified portfolio of investments, during which the fund will gradually grow to its full size of EUR 327.5m.

The Seed Capital and Business Development (SC&BD) budget of EUR 40m aims to further the impact of the investment services by:

1. Supporting early-stage SME finance initiatives that are of strategic interest for the DGGF, but too young, small or risky for an investment to form part of the DGGF investment portfolio;
2. Supporting DGGF investment clients to strengthen the local entrepreneurial ecosystem, to offer business development support to their clientele of local SMEs or to bring their tax/ESG/result measurement practices in line with DGGF standards;
3. Developing and sharing practice-based knowledge: by working with and learning from investees, co-investors and other field builders;
4. Developing entrepreneurial ecosystems by supporting local initiatives that provide quality and affordable capacity-building services to young and first-time entrepreneurs in a sustainable way.
