### Supporting the provincial expansion of SHE Cambodia

DGGF's Seed Capital & Business Development (SC&BD) facility is supporting SHE Investments to expand their acceleration and incubation services to four rural Cambodian provinces.

As SCBD's [#ClosingtheGap](#) study illustrates, the level of female entrepreneurship in Cambodia is high, with many women owning their own business. However, the number of support services for these entrepreneurs – particularly outside the capital city – is small and access to finance is limited.

SHE has been operating successfully in Phnom Penh since 2015 and supported over 80 women with incubation and acceleration programs. These entrepreneurs have been able to grow their revenues, hire employees and are empowered to be decision-makers. Over the years, SHE has become a key partner for embassies, NGOs and corporates to train female entrepreneurs in a variety of sectors, across the country.

With SC&BD support, SHE will be able to establish permanent operations to serve female entrepreneurs in Siem Reap, Battambang, Sihanoukville and Kampong Cham. Running incubation and acceleration programs in the provinces will be instrumental in moving the needle for female entrepreneurs outside the capital Phnom Penh.
