Foxmont Philippine Ventures Fund III Philippines

Supporting tech-enabled growth for Philippine SMEs

Foxmont Philippine Venture Fund III is a venture capital firm operating in the Philippines that invests in SMEs through equity and quasi-equity instruments. The fund is sector-agnostic, focusing on tech opportunities that span across various sectors such as e-commerce, fintech, logistics, media, food & agricultural technology, health technology, education technology, and insurance technology.

Building on the success of Fund I (US\$ 4M) and Fund II (US\$ 21.3M), which have collectively supported 39 innovative companies including Kumu, Edamama, Colourette, Ztock, and Peddlr, Foxmont is now in the process of raising Fund III. This new fund aims to target a broader range of stages from seed to Series B. With the support of DGGF Fund III will continue to focus on tech-enabled opportunities across various sectors, ensuring the growth and development of SMEs in the Philippines.

Investment

DGGF commits a loan of USD 8 million.

Sector

Sector agnostic, with a focus on technology
